| | Siegen, February | 201 |

The my-AHA team in Siegen conducted a workshop with local end-users.

Through a presentation as well as interactive stations the end-users were introduced to some of the health-related off-the-shelf-technologies of the project which are compatible devices for the my-AHA-platform.

After the workshop the participants could take one or more devices and try it out for several months. Further interviews and focus group discussions were used to generate end-user feed-back, and helped to design the my-AHA system.
